

Admin Demo

Purpose

The purpose of the Admin Demo Website is to provide a platform for administrators to create login credentials for users and maintain client details.

Features

1. Admin/User Management

- Create, edit, delete and generate login credential for Client accounts.
- Assign roles and permissions to client to access our product for specific amount of time (by default it will 7days).

2. Client Management

- Update client information.
- View and manage client details.
- Create Intend Score.

3. Login Credentials

- Admin generates login credentials for users and can reset passwords if needed.
- Users can log in using their credentials and access the system.

4. Dashboard

- Provides an overview of user activity, client details, and system statistics.
- Admins and users can view the dashboard to get insights into the system.

5. Security

- Implements secure authentication mechanisms to protect user data.
- Ensures data encryption and secure storage of sensitive information.

6. Intend Score

- Generate indent score based on client interaction with our demo product.

Technology Used

- ❖ **Frontend:** Tailwind CSS, TypeScript, React
- ❖ **Backend:** Node.js
- ❖ **Database:** MongoDB

User Roles

Administrator: Can create, edit, delete and generate login credential for Clients accounts, manage client details, and access all features of the admin panel.

Workflow

1. Admin/User Management

- Admin creates a new user account and assigns a role.
- Client receives login credentials via email.

2. Client Management

- Admin adds new clients to the system and updates their information.
- Users can view client details and update them if necessary.

3. Login Credentials:

- Admin generates login credentials for users and can reset passwords if needed.
- Client can log in using their credentials and access the system.

4. Dashboard:

- Provides an overview of user activity, client details, and system statistics.
- Admins can view the dashboard to get insights into the system.

5. Security:

- Implements secure authentication mechanisms to protect user data.
- Ensures data encryption and secure storage of sensitive information.

6. Intend Score:

- Generate indent score based on client interaction with our demo product.

Conclusion

The Admin Demo Website provides a comprehensive platform for managing client accounts, client details, and system security. With its user-friendly interface and robust features, it offers an efficient solution for administrators to create login credentials and maintain client information.
